Sec 2, Team #4: Workload Distribution

Name	Contributions
Hazem Ajlan	- Implemented the 'User' class (source and ui files) - Developed the 'Playlist Management' form and declared class functions - Introduced the 'Search Songs' functionality on the 'User' dashboard
Zeiad Mohamed	- Designed and implemented the 'Song Creation Page' ('Songpage' class) and declared class functions - Developed the 'Admin' page
Ali Gawad	- Designed and implemented the 'Playlist Creation' page - Assisted in developing the 'Song' class
David Boules	- In charge of code review across all classes and forms - Designed and implemented the 'Main Window' (login page) - Developed the 'Song' and 'Playlist' classes for storing songs and playlists - Designed the 'Reports' page form - Refined all UI designs - Managed all file handling and implemented the 'UsersList' data structure for managing/storing user info

(Note: 'PlaylistManagement', 'PlaylistCreator' and 'Reports' functionalities are not developed at this stage)

Additionally, all team members frequently attended check-in meetings every 3-4 days to discuss progress and provide feedback on other members' work

All team members confirm that the above table accurately represents each person's contributions to Milestone 2. Everyone has reviewed and agreed to this workload distribution.
